## SUMMARY

---

Backend Developer specializing in Node.js and Express, focused on building scalable REST APIs and real-world backend systems. Built and deployed a Job Portal backend featuring authentication, role-based access, pagination, and file uploads.

## EDUCATION

---

### GBS Secondary School

Senior Secondary (12th)

Bakhtawarpur Delhi 110036

2024-25

## PROJECTS

---

### Job Portal Backend | Node.js, Express, MongoDB, JWT, Multer, Joi

- Built and deployed a production-ready REST API using Node.js and Express
- Implemented JWT-based authentication and role-based access control (Candidate / Recruiter)
- Designed job management system with filtering, sorting, and pagination
- Developed job application feature with resume upload using Multer
- Prevented duplicate applications and enforced ownership-based authorization
- Integrated validation using Joi and implemented rate limiting for security
- Deployed backend on Render for public access

GitHub: <https://github.com/PardeepSingh17/Job-Portal>

---

### Weather App | React, API Integration

- Built a weather application using React with real-time API data fetching
- Implemented error handling for invalid city inputs and API failures
- Managed state effectively and displayed dynamic weather data

GitHub: <https://github.com/PardeepSingh17/Weather-App-React>

---

### Todo App | React, Local Storage

- Developed a task management app with add, delete, and update functionality
- Implemented local storage to persist data across sessions
- Designed clean UI with improved user experience and state management

GitHub: <https://github.com/PardeepSingh17/ToDoApp>

---

### Wanderlust | Node.js, Express, MongoDB

- Built a backend-driven web application for listing and managing travel destinations
- Implemented CRUD operations and structured backend using MVC architecture
- Handled routing, data validation, and database integration using MongoDB

GitHub: <https://github.com/PardeepSingh17/Wanderlust>

## TECHNICAL SKILLS

---

**Languages:** JavaScript

**Frontend:** HTML, CSS, React, MUI

**Backend:** Node.js, Express.js

**Database:** MongoDB (Mongoose)

**Tools and Libraries:** JWT, Multer, Joi, Git, Postman
